## SNOW AND ICE REMOVAL SPREADER WD 40 M2

The Mini Spreader WD 40 M2 is designed for use in snow and ice removal for private and hobby users. The spreader is made of steel with CDC coating and is ideal for spreading salt and icing agents on frozen walking paths, parking areas and other small private surfaces.

### TECHNICAL DATA

↗	Working width.....	1 - 5 m with salt
✂	Dimensions.....	H 60 cm, W 45 cm, D 60 cm
📦	Hopper.....	40 l hopper (approx. 50 kg salt)
⚖	Net weight.....	23 kg
🔌	Power data / power supply.....	12 V / 30 A

### ITEMS INCLUDED

- Control Box 2.10
- Frame with CDC coating (usual in automobile industry)
- Spreading disc, agitator, motor shaft and metering slider made of stainless steel
- Electric spreading disc and adjustable throwing vanes
- 1 deflector, top link mounting, counter plate
- 3 m cable for power supply from the battery to the Control Box, 6 m cable from the spreader to the Control Box

### YOUR BENEFITS

- High quality Control Box (speed (rpm) measurement, regulation and control)
- Automatic start in the case of firmly tapped spreading material
- Straightforward adjustment of the working width from the driver's seat
- Multiple mounting options
- May also be used in summer for spreading catch crops.

### ACCESSORIES

- Pick-up mounting bracket
- Mounting kit towing hitch
- Mounting kit quad (ATV) bracket height-adjustable
- Extension cable ES SS 5 m

## SNOW AND ICE REMOVAL SPREADER UDW 100 M1 / UDW 250 M1

The Universal Dispensers UDW 100 M1 and UDW 250 M1 have a metering unit made of stainless steel. The exact metering by means of a seeding shaft makes them a reliable working tool for use in professional winter service. Due to the fully-electronic regulation of the Dispenser it is possible to adjust both the working width and the spread rate from the driver's seat while driving.

### TECHNICAL DATA

↗	Working width.....	1 - 6 m with salt or grit
⚙	Max. metering quantity.....	up to 20 kg salt / minute
✂	Dimensions.....	H 110 cm, W 55 cm, D 55 cm (UDW 100) H 130 cm, W 100 cm, D 85 cm (UDW 250)
📦	Hopper.....	105 l hopper (approx. 120 kg salt) (UDW 100) 250 l hopper (approx. 280 kg salt) (UDW 250)
⚖	Net weight.....	46 kg / 80 kg
🔌	Power data/power supply.....	12 V / 30 A

### ITEMS INCLUDED

- Optionally with Control Box 1.2 or 5.2
- Frame with CDC coating (usual in the car industry)
- Complete metering unit made of stainless steel
- Electric spreading disc with 4 adjustable throwing vanes and electric seeding shaft
- 1 deflector, top link mounting, counter plate, calibration bag
- 1 Flex seeding shaft with 80 mm diameter
- 3 m cable for power supply from the battery to the 3-pin plug and 1,5 m cable from the 3-pin plug to the Control Box
- 6 m cable from the spreader to the Control Box

### YOUR BENEFITS

- Small and large quantities can be metered with precision using Flex seeding shaft with 80 mm diameter
- Spreading of salt, small-grained grit or mixtures thereof (possible without modification)
- Positively controlled agitator
- Speed-dependent quantity output (with sensors) <sup>1</sup>
- Simple calibration test (with standing and folded disc)
- Spreading of corrosive spreading material (fertiliser) is possible

### ACCESSORIES

- Calibration button <sup>1</sup>
- Fill level sensor
- Pick-up mounting bracket <sup>2</sup>
- Extension cable PS MX 2 m & 5 m
- Shovel bracket
- Calibration slide
- Lighting <sup>3</sup>

<sup>1</sup> For use with Control Box 5.2  
<sup>2</sup> Only for UDW 100 M1

<sup>3</sup> Only for UDW 250 M1
